READY SHORTLY

Klystron Tubes

By A. E. HARRISON, Assistant Professor of Electrical Engineering, Princeton University; formerly Klystron Applications Engineer, Sperry Gyroscope Company.

A clear introduction to the behaviour of Klystron tubes, bringing out the chief difference from that of older type tubes which do not involve transient time effects.

273 pages. 9 × 6 17*s.* 6*d.* net

Radar System Engineering

By MASSACHUSETTS INSTITUTE OF TECHNOLOGY

(Radiation Laboratory Series)

Edited by LOUIS N. RIDENOUR, Professor of Physics, University of Pennsylvania.

This distinctive new book, the first volume in the important Radiation Laboratory Series, outlines the general principles of design of radar systems.

OXFORD BOOKS

MODERN ADVANCES IN INORGANIC CHEMISTRY

By E. B. MAXTED *20s. net*

The classical systematization of inorganic chemistry within the framework of the periodic system has now been followed by a phase in which the scope of the science has been enlarged in a revolutionary way by an increased knowledge of atomic structure and by the application of the newer theories of matter and energy. The subject-matter of the above book falls into three main categories. In the first place an attempt has been made to present in an elementary and easily readable manner an outline of this newer physical background. Secondly, the systematic chemistry of a number of recently discovered elements (deuterium, hafnium, masurium, and rhenium) is dealt with in greater detail. The remainder of the work summarizes some results of nuclear chemistry with special reference to artificial radioactive elements. It is hoped that the book will be of use as a résumé of the enlarged scope of modern inorganic chemistry.

The book is parallel in method to *Modern Theories of Organic Chemistry*, by H. B. Watson (Second Edition, 1941, 20*s.* *net*).

THE PRINCIPLES OF QUANTUM MECHANICS

By P. A. M. DIRAC. *Third Edition, 25s. net*

(*International Series of Monographs on Physics*)

The third edition of this work has been brought out to meet a continued demand. Many sections have been extensively revised, and the book deals with the results of research that has taken place since the second edition appeared in 1935.

OXFORD UNIVERSITY PRESS, Amen House, London, E.C.4

CAMBRIDGE
SELF-CONTAINED WHEATSTONE BRIDGE

6698

Convenient for laboratory and workshop use, this robust instrument requires no external accessories, and, as all connections are made by dust-protected switches, is thoroughly reliable in operation.

Details of 120 Electrical Instruments are given in LIST 163-N.

No. of Dials or Sections	Resistance Values (ohms)	Range measurable (ohms)	Accuracy (per cent.)
4 dials 8 ratio coils	1 to 11,110	0·01 to 10^7	0·1

ALLANTOIN
For medicinal and synthetic uses.

ALLOXANTIN
For organic syntheses and as a raw material for the manufacture of riboflavin.

HYDRAZINE SULPHATE
One of the most powerful reducing agents.
Used in rare-metal refining, and as an anti-oxidant in light-metal fluxing and soldering.

o-TOLYL THIOUREA
and other aromatic derivatives of Thiourea.

RUBIDIUM SALTS
For the manufacture of thermionic and photo-sensitive valves.

FORTHCOMING TITLES

Physical Chemistry

By E. D. Eastman, Late Professor of Chemistry; and G. K. Rollefson, Professor of Chemistry, University of California.

504 pages 9 × 6 22/6 net

A compact, logical presentation of the principles of physical chemistry. In the first half of the book the authors discuss the structure of matter in relation to its chemical and physical properties and introduce the first and second laws of thermodynamics. The second half is devoted to the applications of the laws of thermodynamics to equilibria between phases and in homogeneous systems, the electrical properties of solutions, chemical kinetics, and the topics (1) the interactions of matter with light, and (2) surface phenomena.

The Mineral Key

By Howard B. Graves, Jnr., Chemist, Research Division, International Minerals and Chemical Corporation; Formerly Chemist, E. I. Du Pont De Nemours; Formerly Geologist, The Texas Company.

178 pages 7½ × 4½ 20/- net

Provides the amateur mineralogist and mineral collector with helpful tables and methods to use in identifying 823 minerals.

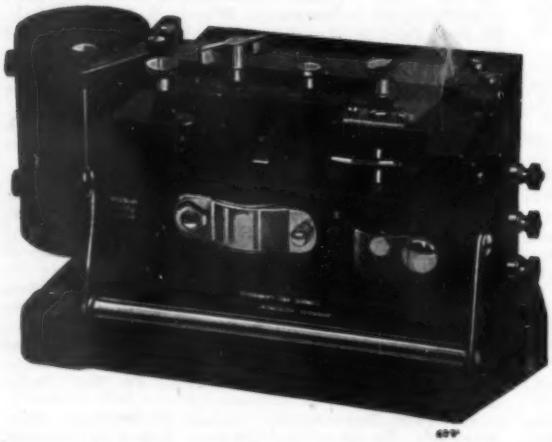
CAMBRIDGE UNIVERSAL VIBROGRAPH



This instrument will record horizontal or vertical vibrations. By simple interchange of parts, it can be adapted for rotational or spot vibration tests, or for use as a deflectograph. It employs the stylus-on-celluloid method of recording. The whole fits in a portable case, which also forms a viewer and photographic enlarger for the records.

Full details are given in our FOLDER No. 62-N.

FORTHCOMING TITLES

THIRD EDITION OF

RADIO ENGINEERING

By Frederick Emmons Terman, Professor of Electrical Engineering and Dean of the School of Engineering, Stamford University. 969 pages, 9 × 6, 35/- net.

For fifteen years this leading standard text has been universally regarded as a work of outstanding excellence. More than 80% of the text has been re-written to incorporate the important changes in the field during the past decade.

THEORY AND APPLICATION OF MICROWAVES

By A. B. Bronwell and R. E. Beam, of the Northwestern University. 470 pages, 9 × 6, 30/- net.

PRINCIPLES AND PRACTICE OF ELECTRICAL ENGINEERING

By Alexander Gray, late Professor of Electrical Engineering, Cornell University; revised by G. A. Wallace, Professor of Electrical Engineering, McGill University. 6th Edition. 568 pages, 9 × 6, 25/- net.

McGraw-Hill Publishing Co. Ltd.

Aldwych House, London, W.C.2

ARNOLD BOOKS

INTERMEDIATE PHYSICS

By **C. J. SMITH, Ph.D., M.Sc., A.R.C.S.** *New (Third) Edition, Complete.* xii+1,023 pages, 709 diagrams. **Recently published. 21s. net.** The separate parts will be published shortly, and their prices are as follows: **Part I, Properties of Matter, 4s. 6d.** net; **Part II, Heat, 5s.** net; **Part III, Optics, 6s.** net; **Part IV, Acoustics, 3s. 6d.** net; **Part V, Magnetism and Electricity, 8s. 6d.** net.

The third edition has been completely revised and enlarged, and many new diagrams have been added.

THE FORMATION OF THE CONTINENTS BY CONVECTION

By **G. F. S. HILLS, B.A.** Demy 8vo, viii + 102 pages, illustrated. **To be published on December 4. 7s. 6d.** net.

This book discusses why the continents—consisting of granite—lie in one hemisphere and occupy about one-quarter of the earth's surface, and the ocean floor—probably a basaltic rock—occupies the remainder.

January 1948

SCIENCE PROGRESS

A Quarterly Review of Scientific Thought, Work and Affairs

Contents

Electron Optics Prof. G. I. FINCH, M.B.E., F.R.S., and H. WILMAN, Ph.D.

The Mechanism of Action of Insulin Prof. F. G. YOUNG, D.Sc.

Synthetic Perfumes T. F. WEST, D.Sc.

Some Applications of Electronics in Metrology E. J. B. WILLEY, D.Sc.

Fifty Years of the Inert Gases M. SCHOFIELD, M.A.

RECENT ADVANCES

ESSAY REVIEW AND OTHER REVIEWS

It is advisable to order your copy early from a bookseller (or in case of difficulty from the publishers). Each number about 200 pp., 9¼ in. × 6 in., illustrated. 7s. 6d. net per copy. Annual postal subscription anywhere in the world, 31s. 2d.

OPTICAL WORKS LTD

THE EALING 6-INCH F 1·25 SCHMIDT TELESCOPE

These telescopes are being built to the following specification.

CORRECTING LENS. 6½ inches in diameter : 6 inches effective aperture.

MIRROR. "Pyrex" brand glass, aluminised. 10 inches in diameter : 15 inches radius of curvature.

ANGULAR FIELD. 16° as an orthodox Schmidt instrument, readily convertible to a flat field instrument of smaller angular field.

ENQUIRIES INVITED for a complete, rigidly mounted telescope, with motion in declinstion and right ascension, or telescopes without mounting, or just the optical elements alone.

WHY THE UNIVERSE?

By Percy A. Campbell

Basic world-explanation, comprising explanations of matter, uranium's origin, gravitation, electricity, radiation, cosmic rays, red-shift of nebular light, living organisms, and consciousness. This book is by the author of the recent papers: "Earth's Origin and Its Magnetism;" "Neutron Theory of the Novae;" "The Scavenger Comets;" The Sun as a Coming White Dwarf Star;" "Neutron Theory of Heavy Matter;" and a new Nebular Hypothesis: "'Jupiter' Theory of the Origin of the Solar System." $2.50

FORTHCOMING TITLES

ELECTRONIC CIRCUITS AND TUBES

By the War Training Staff of the Cruft Laboratory, Harvard University.

948 pages 9 × 6 37/6 net

This book, together with its companion volume "Transmission Lines, Antennas, and Wave Guides", comprises the lecture material given at Cruft Laboratory in a course of instruction in pre-radar training for officers in the Armed Forces. This volume covers the basic theory of electronic tubes and electric circuits employed in conjunction with electronic tubes, with emphasis on the applications in the fields of communication and electronic control.

VERY HIGH FREQUENCY TECHNIQUES

Compiled by the Staff of the Radio Research Laboratory, Harvard University. Herbert J. Reich, Editor.

2 volumes 1,057 pages 9 × 6 70/- the set

This work presents those techniques, at frequencies above about 100 mc., that are of general interest and value, and which were developed during the course of the work at the Radio Research Laboratory.

POINTERS FOR DESIGNERS

The G.E.C. range of electrostatic industrial cathode ray tubes includes four screen sizes down to 1½" diameter. Widely used in measuring and similar instruments, their outstanding features include:—

- Brilliant screen traces and undistorted frequency response over a wide range.
- Screens for photographic recording or for producing sustained images, when specially ordered.

Electrostatic tubes for the maintenance of G.E.C. Television sets are also available. Other types will be in production shortly.

Detailed technical data sheets are available upon request.
